Lymphoedema – Lipedema – Obesity

The value of biometric data

14th – 15th April 2023 · Wolfsberg, Austria

Programme

Lymphoedema – Lipedema – Obesity

The value of biometric data

Dear Sir or Madam,
Dear Colleague,

We are facing major challenges regarding care quality and financial feasibility in the healthcare sector. Therefore, the proof of the efficiency for the resources used is an understandable request made to healthcare providers.

In the areas of lymphoedema, lipedema and obesity, biometric data is recorded and used for diagnosis as well as the documentation of outcome data. However, the value of these types of measured parameters is not always clear. Changes are currently happening in the area of rehabilitation, meaning that defined goals are no longer measurable biometric values but participation goals set by the patient.

As a result, there will be a wide discussion spectrum concerning the conference subject “The value of biometric data in cases of lymphoedema, lipedema and obesity” of our 8th Lymph Clinic Day Wolfsburg, which we would like to invite you to.

Kind regards,
Prim. Dr. med. Christian Ure
